

MEDICAL IMAGING REPORT

Patient Information

Patient ID:	TEST-1IK34VN3	Patient Name:	Simple Test Patient
Age:	45	Priority:	9 (HIGH)
Scan ID:	SCAN-1764570125928-owl9v74	Scan Date:	December 01, 2025 06:22 AM

Examination Details

Scan Type:	CT_CHEST
Device Model:	Siemens-SOMATOM-Simulator
Number of Slices:	150
Slice Thickness:	1.0mm
kVp:	120
mAs:	200
Contrast Used:	No
Image Quality:	Excellent

Findings

- General:** No acute abnormalities detected (**NORMAL**) [Confidence: 90%]
- Soft tissues:** Unremarkable (**NORMAL**) [Confidence: 95%]
- Bones:** No acute fractures or lesions (**NORMAL**) [Confidence: 93%]

Impression

The examination demonstrates normal anatomical structures with no acute abnormalities identified.

Recommendations

- Immediate clinical correlation recommended
- Consider specialist consultation
- Report findings to be correlated with clinical presentation

Quality Assurance

Image Quality:	Excellent
Motion Artifacts:	Minimal
Noise Level:	Low
Diagnostic Quality:	Acceptable
